13 MOJAVE BASIN WATER CASES

Assigned to Hon. Judge Hopp, Dept. 1

14 _____
15 CITY OF BARSTOW, et al,
16 Plaintiff,

**CITY OF HESPERIA’S SUPPLEMENTAL
OPPOSITION TO GOLDEN STATE
WATER COMPANY’S MOTION TO
ENFORCE JUDGMENT**

17 v.

Date: OCTOBER 22, 2024
Time: 1:30 am

18 CITY OF ADELANTO, et al,

Department M302, Menifee Justice Center

19 Defendant.

Hon. Craig G. Riemer, Judge Presiding by
Assignment

20 _____
21 AND RELATED CROSS-ACTIONS

22
23 Defendant City of Hesperia (“City”) hereby submits this supplemental opposition to Golden
24 State Water Company’s Motion to Enforce (“Motion”) this Court’s judgment (“Judgment”).

25 **I. INTRODUCTION**

26 On September 6, 2024, Golden State Water Company (“GS”), which is located in the Centro
27 area of the groundwater basin, filed a motion in court asking for an order that the Watermaster:

1 (1) Evaluate the production safe yield (PSY) for the Alto Subarea, the Centro Subarea, the
2 Transition Zone (aka the “TZ” between Alto and Centro), including the calculation of the PSY of
3 the subareas; conduct a factual investigation on which those calculations are based; and analyze any
4 underlying assumptions inherent in the calculations (whether specified in the Judgment or not); and

5 (2) submit to the Court a report containing Watermaster’s findings and calculations as a
6 component of its 31st Annual Report of the Mojave Basin Area Watermaster Year 2023-24.

7 Golden State also asks that the Watermaster be ordered to prepare and submit to the Court a
8 report identifying recommendations and a timeline to improve hydrologic data collection and
9 scientific and engineering estimates for preparation of future updates to PSY and continued
10 implementation of the Judgment, which shall consider the recommendations contained in the Expert
11 Report, as a component of its 32nd Annual Report of the Mojave Watermaster for Water Year 2024-
12 25.

13 GS’s motion is based on a faulty assumption that the Alto subarea has a specific obligation
14 to Centro. Under the Judgment, the Alto Subarea Obligation (Base Flow and Subsurface Flow) is
15 to the Transition Zone, not to the Centro Subarea. Based on the Wagner Declaration, the evidence
16 is clear that the Alto Producers have met their Base Flow and Subsurface Flow obligations to the
17 Transition Zone. Since the relief requested by GS (and characterized as “enforcement of the
18 judgment”) does not follow the terms of the Judgment, it should be rejected.

19 Moreover, the Brown Report Figures 5-2 to 5-18 use a misleading 20-year time period that
20 starts right after groundwater elevations in GS wells increased dramatically in response to the 2005
21 wet year. Of the three very wet years in the 2005 to 2024 time period, water year 2005 was
22 considerably wetter than 2011 and 2023 (see Figure 3 in Watermaster Production Safe Yield &
23 Consumptive Use Update; February, 2024). Thus, the starting point for the Brown Report 20-year
24 period is artificially inflated (i.e., has abnormally high groundwater elevations) by selecting 2005
25 as the first year of the 20 year sequence. The Brown Report’s use of artificially high groundwater
26 elevations in the first year of the analysis period tends to give the impression of declining
27 groundwater elevations that may only be occurring because the starting point is not representative.

1 Golden State’s arguments were made earlier this year, and GS’s arguments were not
2 accepted at that that time; they should be rejected again, and the motion should be denied.

3 **II. ARGUMENT**

4 **A. GS MISCONSTRUES THE JUDGMENT**

5 GS misstates certain obligations under the Judgment, which provides that the Alto
6 Producers’ Subarea Obligation is to the Transition Zone, not the Centro Subarea. The Subarea
7 Obligation owed by the Alto Subarea Producers is to the Transition Zone, not to the Centro Subarea.
8 Exhibits G of the Judgment provides:

9 1. Subarea Obligations. Producers in the respective Subareas shall have the
10 obligation to provide the following average annual and minimum Annual Subsurface
11 Flows and/or Base Flows per Year: . . .

12 e. Alto subarea Producers – an average Annual combined Subsurface Flow and
13 Base Flow of 23,000 acre-feet per Year to the Transition Zone. . . [Emphasis added.]

14 The Judgment defines “Base Flow” as “That portion of the total surface flow measured
15 Annually at Lower Narrows which remains after subtracting Storm Flow” (paragraph 4, subd. “h”).

16 As to the Alto Producers’ obligation to provide subsurface flow, paragraph 1, subd. (e) of
17 Exhibit G of the Judgment, in pertinent part states: “For the purposes of Paragraph 6 of this Exhibit
18 G, the Subsurface Flow shall be deemed to be 2,000 acre-feet per year” (emphasis added).

19 GS’s expert’s report overlooks the fact that the Alto Producers’ compliance with their
20 Subarea Obligation the Transition Zone is confirmed and verified by actual measurement of the
21 Base Flow component, as explained by the Wagner Declaration filed in support of the Watermaster’s
22 Opposition. The Brown Declaration does not discuss Watermaster evidence showing stable
23 groundwater levels in the Transition Zone and western portion of the Centro Subarea. (Wagner
24 Declaration ISO Opposition to GSWC Motion Exhibit A, Alto Subarea Transition Zone
25 Hydrographs 2024 and Exhibit B, Centro Subarea Hydrographs 2024, at pdf pp. 15-18.)

26 **B. THE BROWN REPORT HYDROGRAPHS FOR THE SELECTED TIME**
27 **PERIOD DO NOT ADEQUATELY DEMONSTRATE THE OCCURRENCE OF LONG-**
28 **TERM CHRONIC GROUNDWATER ELEVATION DECLINES IN GS WELLS.**

1 GS has not established cause for the Court to direct Watermaster to reevaluate PSY for the
2 Alto and Centro Subareas. In the Ruling on the Watermaster’s Annual Motion to Adjust Free
3 Production Allowance for Water Year 2024-2025 (“FPA Ruling”), this Court directed that “[a]ny
4 expert opinions offered either in support of or in opposition to any motion shall be limited to
5 opinions that (a) are stated to be more likely than not true and (b) are supported by such analysis
6 and evidence to allow a finder of fact to understand the reasons for that opinion.” (FPA Ruling at p.
7 7, ¶ 3.) The opinion on which GS relies (Brown Declaration) to argue that PSY for the Alto and
8 Centro Subareas should be revised does not meet the above standard, and City joins the
9 Watermaster’s objections to the Declarations of Anthony Brown and Mr. Laton.

10 The determination of safe/sustainable yield and associated potential for chronic groundwater
11 elevation decline is ordinarily conducted over a multi-decade time period (and logically longer than
12 20 years for the type of analysis conducted by Mr. Brown) that is representative of longer-term
13 climatic/hydrologic conditions. The selected time period for analysis should begin and end in below
14 average water years to minimize water in transition and change in storage in the vadose zone
15 (California Department of Water Resources. California’s Groundwater; Working Toward
16 Sustainability. Bulletin 118, Interim Update, available at
17 [https://data.cnra.ca.gov/dataset/calgw_update2020/resource/d2b45d3c-52c0-45ba-b92a-
18 fb3c90c1d4be](https://data.cnra.ca.gov/dataset/calgw_update2020/resource/d2b45d3c-52c0-45ba-b92a-fb3c90c1d4be)). The Brown Report time period begins in a wet year.

19 The Brown Report does not provide groundwater level data for non-GS wells in the Centro
20 Subarea or Transition Zone. No information is provided to demonstrate long-term chronic
21 groundwater level declines in other non-GS wells within the Centro Subarea. Concentrated
22 pumping can cause localized groundwater elevation declines and/or or a groundwater elevation
23 depression that are not necessarily representative of the subbasin/subarea water balance as a whole.

24 Again, the Brown Declaration does not discuss Watermaster evidence showing stable
25 groundwater levels in the Transition Zone and western portion of the Centro Subarea. (Wagner
26 Declaration ISO Opposition to GSWC Motion Exhibit A, Alto Subarea Transition Zone
27 Hydrographs 2024 and Exhibit B, Centro Subarea Hydrographs 2024, at pdf pp. 15-18.)

1 **C. GS' ARGUMENTS WERE ALREADY LITIGATED IN GS'S FILING IN**
2 **RESPONSE TO THE WATERMASTER'S MOTION TO ADJUST FREE**
3 **PRODUCTION ALLOWANCE FOR 2024-25, WERE ALREADY ADDRESSED BY**
4 **THE WATERMASTER, AND THE RELIEF WAS NOT GRANTED BY THE**
5 **COURT.**

6 **(1) GS rehashes its argument that the Watermaster be ordered to consider and prepare**
7 **an annual report for the Transition Zone “as recommended by Aquilogic.”**

8 GS argues that the Watermaster’s Water Budget for the 2024 PSY Update is insufficient and
9 “likely” overestimates inflow to Centro. (GS Motion p. 14.). GS asks that the court order the
10 Watermaster to reevaluate the 2024 PSY Update to “evaluate the potential complex groundwater
11 flow dynamics in the Transition Zone”. However, the Watermaster has already done this, and
12 addressed this argument before.

13 This is the same relief GS requested in Spring of 2024 for a hearing in June 2024.

14 Prior to that hearing, the Watermaster responded at pages 6-7 of the Watermaster’s May 28,
15 2024 Reply. GS suggested that the Watermaster prepare a report for the transition zone (TZ) in line
16 with GS’s expert’s (Aquilogic) recommendations, which would include a water budget for the TZ.
17 Watermaster and its engineer responded:

18 “[T]here are two significant elements of the water balance to the TZ, both of which
19 are measured or based directly on measurement. The waste stream from the Victor
20 Valley Wastewater Treatment Plan is discharged within the TZ and is measured and
21 discharged within the TZ. The flow at Lower Narrows is measured directly by USGS
22 weekly to estimate the mean daily discharge. Both of these records are considered
23 reliable and adequate for estimating the water balance in the TZ and calculating
24 outflow across the Helendale Fault. *The water budget elements recommended by*
25 *Aquilogic are already included in the water budget analysis for the TZ.* The use of
26 the USGS Basin Characterization Model (BCM) and the Parameter-elevation
27 Regressions on Independent Slopes Model (PRISM) are included in the Upper
28 Mojave Basin Model.” (Watermaster’s May 28, 2024 Reply Brief in Support of

1 Motion to Adjust Free Production Allowance for Water Year 2024-25, p. 7: 1-13,
2 citing Wagner Supplemental Declaration in support of Reply, Exh. A, 4:3-12
3 [Emphasis added].)

4 **(2) GS rehashes Its Prior Request that the Watermaster Install, Operate and Maintain**
5 **Meters to Monitor Stream Flow in the TZ**

6 At page 13 of its motion, GS asks that the Watermaster be ordered to install, operate and
7 maintain meters and monitor stream flow in the TZ.

8 However, as the Watermaster and its engineer indicated on May 28, 2024,
9 “monitoring wells are, in fact, present in the Transition Zone and near the Helendale
10 fault [I]n installation of a stream gage at or near the Helendale Fault would `be
11 subject to the same conditions that resulted in [the Wild Crossing gage’s]
12 abandonment, as noted by USGS, Line, 1996. Similarly, installing a stream gage at
13 or near the Helendale Fault as suggested by GSWC would encounter the same
14 conditions, resulting in an unreliable record.’ Data from the monitoring wells located
15 at or near the Helendale Fault are used by the Watermaster and the Watermaster
16 Engineer annually. Such data is published in the Watermaster’s Report every year”.
17 (Watermaster’s May 28, 2024 Reply, p. 6, Section D, citing Wagner Supplemental
18 Declaration, at 4:1-2, Exh. A 3:21-25, in support of Watermaster May 28, 2024
19 Reply.)

20 **(3) GS Again Attacks the Watermaster’s Use of the Groundwater Model, an**
21 **Argument Previously Made and Rejected.**

22 On page 16 of GS’s Motion, it argues “the Upper Mojave River Basin (UMRBM) model is
23 too limited in spatial extent to be useful for simulations of groundwater in the Transition Zone and
24 the model cannot yet simulate the potentially complex groundwater flow dynamics between the
25 Transition zone and the Centro Subarea because a portion of the Transition Zone and the Centro
26 Subarea are not included in the model.” (GSWC Motion at 16:1-5, citing Evidence, Exh. 1, pp. 26-
27 2 [citing its Expert report, section 4.3].).

1 This argument was refuted this Spring. As explained in the Watermaster’s Engineer’s
2 Declaration, the Upper Mojave Basin Model “incorporates hydrologic data and analysis to represent
3 the conditions of the Alto Subarea for the period 1951-2020. A description of the Model and its
4 assumptions and output is available as Appendix A-G of Exhibit 5.” (Watermaster’s May 28, 2024
5 Reply, p. 7; Wagner Declaration Ex. C to Watermaster Motion to Adjust FPA for Water Year 2024-
6 25, 3:11-14.)

7 In addition the Watermaster’s Engineer concluded:

8 “the model output for future conditions resulting from importing 17,475 acre-feet per
9 year in Alto will increase water flow at the Upper Narrows at the Mojave Narrows
10 Regional Park, increase flow through the Lower Narrows and support habitat
11 throughout the Transition Zone, while also increasing flow downstream to Centro
12 across the Helendale Fault. The modeling output shows that average annual flow as
13 measured at Lower Narrows will increase by about 9,000 acre-feet per year (Exhibit
14 5, Appendix A, Figure 4).” (Wagner Decl. Exhibit C to Watermaster Motion to
15 Adjust FPA for WY 2024-25, 4:1-6.)

16 Mr. Wagner’s Supplemental Declaration in Support of Reply in support of Watermaster
17 Motion to Adjust FPA for WY 2024-25, also explained flows across Helendale Fault, which
18 represents the long term average supply to Centro, will not occur every year. (Wagner Suppl. Decl.
19 Exh. A, at 4:13-20, in support of Watermaster Reply in support of Watermaster Motion to Adjust
20 FPA for WY 2024-25.) Like many river and stream systems in the west, the Mojave River system
21 is episodic, meaning there are long periods of well-below average flow followed by occasional
22 periods of well above average flow. (*Ibid.*) The Judgment is predicated on the long term average
23 flow. (*Ibid.*) The Upper Mojave Basin Model is being expanded already to include the TZ and the
24 Centro and Baja subareas, and when complete, will provide another tool. (*Ibid.*) Thus, GS’s motion
25 in regard to this model is unnecessary.

26 **III. CONCLUSION**

27 GS misconstrues the terms of the Judgment. GS also cherry-picked non-representative years
28 in a manner that does not following the Judgment.

1 GS offers no evidence or expert opinion that GS's well data is representative of conditions
2 within the greater Centro Subarea. The Court cannot draw any conclusion about Centro Subarea
3 groundwater conditions or flows from the Transition Zone to the Centro Subarea considering only
4 GS well data. Accordingly, GS has not established that it is more likely than not (1) that decreases
5 in inflow (if any) to Centro have contributed to declining water levels in GS's wells or (2) that Alto
6 is failing to meet its obligation to the Transition Zone.

7 The arguments made in GS' motion were made by GS earlier this year, and, at that time,
8 were rejected by the Watermaster and the Court. Golden State's arguments should be rejected again,
9 and the motion should be denied.

10 Respectfully submitted.
